ELECTRICAL CONSUMPTION ECONOMIZERS

The *IntelliCon*[®] economizers typically reduce compressor electric use by 10% to 20% or more. The *IntelliCon*[®] electricity consumption economizers are a microcomputer controlled, UL listed device that automatically adjusts the compressor cycling to achieve the greatest system efficiency and reduced electrical usage, while assuring consistent temperature levels for even the most temperature sensitive Clients.

Commercial Electric Economizer *Guaranteed 10% minimum electric Savings*

Commercial Air-Conditioner Economizer-CAC is microprocessor-controlled energy-saving device optimized for commercial size air-conditioner systems (4 to 50. Tons systems). Reduces maintenance, wear on parts, no Programming or follow-up visits ever needed. Protects Compressor Against Momentary Power Outages. Compact design 4"H x 4"W x 2½"D

Refrigeration Unit Electrical Consumption Economizer *Guaranteed 10% minimum electric Savings*

Refrigeration Unit Electrical Consumption Economizer –RU is microprocessor-controlled fuel-saving devices. Patented control Reduces Electric Consumption 10% to 20%. UL Listed, "Energy Management Equipment" Increase Savings without replacing or upgrading costly System Components. LED Indicators Show Operating Modes. Protects Compressor Against momentary Power Outages and Short Cycling Simple 15 Minute Installation by qualified Installer. No Programming or Follow-up Visits Required, Maximum Year-Round Efficiency. Reduces Maintenance and Extends Compressor Life. Fail-Safe Operation

Residential Central Air-Conditioner Economizer *Guaranteed 10% minimum electric Savings*

Air-Conditioner Economizer-AC is microprocessor-controlled energy-saving device optimized for residential size air-conditioner systems (up to 4 Ton systems). Reduces maintenance, wear on parts, No Programming or follow-up visits ever needed. Protects Compressor Against Momentary Power Outages. Short Payback Period - Typically 12 to 24 Months. Simple Installation – Takes 15 - 30 Minutes Compact design 4"H x 4"W x 2½"D

HEATING SYSTEM FUEL ECONOMIZERS

Intellidyne has been manufacturing and installing state-of-the-art energy-saving controls since 1996 in major supermarkets, office buildings, hospitals and schools throughout the country. All of our products are guaranteed to deliver a minimum savings of 10% on fuel consumption and decreases burner cycling by 30%. Our Products come with an unconditional 15-year guarantee. We have an excellent reputation for quality, reliability and service and all of our products are designed, engineered and manufactured in the U.S.A.

Commercial Heating Units *Guaranteed 10% minimum fuel Savings*

Commercial Heating Economizers are microprocessor-controlled fuel-saving devices optimized for commercial size heating systems (over 2,500,000 BTU's). Reduces maintenance, wear on parts, emissions and electrical usage, when installed on any new or existing gas or oil boiler. Full illuminated LCD Display. No Programming or follow-up visits ever needed.
 Compact design 7"H x 7"W x 5¼"D

Commercial Hot Water Heating economizer-CHW
Commercial Steam Heating System fuel economizer-CHS

Light Commercial Heating Units *Guaranteed 10% minimum fuel Savings*

Light Commercial Heating Economizers are microprocessor-controlled fuel-saving devices optimized for light commercial size heating systems (300,000 to 2,500,000 BTU systems). Reduces maintenance, wear on parts, emissions, and electrical usage when installed on any new or existing gas or oil burner. Full LCD Display. No Programming or follow-up visits ever needed.
 Compact design 4"H x 4"W x 2½"D

Light Commercial Hot Water Heating System Fuel Economizer-LCH
Light Commercial Steam Heating System Fuel Economizer -LCS

Residential Heating Units *Guaranteed 10% minimum fuel Savings*

HOT WATER HEATING SYSTEM FUEL ECONOMIZER-HW is a Residential version of our microprocessor-controlled fuel-saving device for hydronic heating systems (up to 300,000 BTU's). Reduces fuel consumption 10% to 20%, wear on parts, emissions and electrical usage, when installed on any new or existing gas or oil burner. Decreases burner cycling by 30%

Guarantee

EnCom and the manufacturer, Intellidyne[®], guarantee that you will reduce your energy consumption¹ for heating and or cooling by a minimum of 10% in the first full year of operation. If your equipment does not use 10% less energy in the first full year of use, we will refund the full purchase price of the product.

Warranty

IntelliCon[®] Products carry a limited manufacturers warranty against operational breakdown or defects in materials or workmanship for 15 years on the original installation. If an IntelliCon[®] product fails during normal operation, Intellidyne will replace the product at no charge.

¹ Consumption data must be normalized for the periods of comparison
