

Automatic Standby Generators

EnCom is Canada's leading provider of the Guardian Automatic Standby generators.

The #1 selling standby generator in North America!

Automatic Protection 24 Hours a Day 365 Days a Year

Permanently installed, it starts right away whether you are home or not. Unlike portables, there is no need to go outside, no extension cords & no refueling with messy gasoline because it runs off your propane or natural gas supply.

NEW!!

SOLAR HOT AIR

Capable of heating areas from 1000 sq. feet to commercial buildings, our scaleable solar hot air systems can save 40% on oil (hot air) or electric heating costs. These systems pay for themselves in a few years, they are inexpensive and efficient.

With rising energy costs and power outages EnCom's Solar Hot Air is always there to provide reliable, inexpensive and pollution FREE heat.

For new homes we have combined solar-HRV technology – providing fresh heated air with no energy costs!

Power From Nature!

Solar Hot Water

Solar Hot Air

Automatic Standby Generators

Solar and Wind Electricity

Save up to 75% of energy bill with Solar Hot Water!

Why use a Solar Water System?

Solar energy has the potential to provide you with significant energy for space heating, and your domestic hot water.

Benefits include:

- ❖ Financial savings through reduced energy bills. – Up to **75%** reduction!
- ❖ Reduced reliance on increasing fuel costs, a free source of energy!
- ❖ Reduced environmental impact – (an average family can reduce Green House Gas emissions by 2 tonnes per year)
- ❖ Low maintenance and silent operation
- ❖ Reliable and long lasting
- ❖ **Government rebates** now available, from 15- 40%

Uses of Solar Hot Water:

1. Preheat your boiler tanks as well as use the hot water for your domestic water requirements.
2. You can install solar hot water to power your in-floor heating or baseboard water heaters to heat your home.
3. You can heat homes, commercial buildings, pools, laundry mats, car washes, motel hot water, and retirement homes.

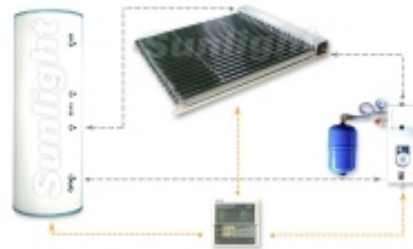

We can customize for any residential or commercial application. Our turnkey systems include circulation kits, advanced shw controllers, stainless steel shw tanks (single & dual coil), aluminum frames & roof mounts

Our evacuated tube Solar systems provides superior energy generation over traditional flat panel technology.

Pricing:

1 panel complete systems to power your domestic hot water - **\$4500**

3 panel complete systems to power your domestic and heating requirements **\$7500**

DEALER ENQUIRIES WELCOMED

Solar and Wind Electricity

EnCom can provide a wide range of solar and wind energy solutions – Generating from 200 watts to 20KW of power.

Give us a call to discuss your grid and off grid requirements.

Intellicon

A microprocessor-controlled fuel-saving device for hot-water heating system.

- ❖ Reduces fuel consumption by 10 – 20%
- ❖ Easily installed in less than one hour
- ❖ No programming or follow-up visits

Reduces maintenance and extends boiler life
